

American Integrations and Communications

Network Cabling & Infrastructure Specialists

In almost every business, communications infrastructure is essential. That's why so many companies and organizations rely on American Integrations and Communications.

Nearly 20 years of experience has helped us become the ideal networking and cabling partner. This means you can trust AIC with virtually any communications challenge from multiple locations to a single installation. No one can match our one-call service and no one gives you such a large resource in terms of locations and capabilities. By employing "related industry" partnerships, we can effectively provide the total package to meet the many requirements of our customers.

One Call Covers It All

From simple Ethernet based network to complex systems involving phone, 10 Base-T, Wireless, Fiber Optics and more, we have the resources to handle any communications task. Call today at (610) 891-1819. We're ready to become your total connectivity solution.

We Get It Right, From The Start

At AIC, we have created a network committed to the highest standards for quality, efficiency and on-time performance. We know the importance of planning and coordinating the installation of communications infrastructures. Because this can be very complicated, AIC has assembled a dedicated team focused on this vital function. Our specialty is making sure that whether you have 2 sites or 200, they all look and perform the same - flawlessly. With a single point of contact and someone who really knows your needs, we can help with all the details. That means you'll have more time to do your own job.

We Built Our Company On Customers Like You

With a commitment to excellence and reputation for quality, AIC does it all—data, voice, video transmission cabling. And that's just the beginning. Our one-call service means you can get all your cabling and communications needs taken care quickly, conveniently, wherever you are.
